VISION
To be a Centre of academic excellence in Built and Natural Environment

MISSION
To offer accessible quality training, research and innovation in order to produce leaders in the Built and the Natural Environment to suit the needs of a dynamic world.
The Department of Architecture offers a Diploma in Architecture, a Bachelor of Science degree in Architecture, a Master of Science degree in Urban Design, and a PhD in Architecture. The Department also offers a Master of Science degree in Building Science and Management. The Department is committed to providing a high-quality education to its students, with a focus on practical and theoretical knowledge in the field of architecture.

The Diploma in Architecture is a two-year program that is designed to provide students with a broad understanding of the principles of architecture, including design, construction, and sustainability. The Bachelor of Science degree in Architecture is a four-year program that builds on the Diploma program, with an emphasis on the development of professional skills and knowledge in the field of architecture.

The Master of Science degree in Urban Design is a two-year program that is designed to provide students with advanced knowledge and skills in the design and planning of urban environments. The PhD in Architecture is a research-based program that is designed to prepare students for careers in academia or research.

The Department of Architecture is located in the heart of Nairobi, Kenya, and has a strong focus on sustainability and environmental design. The Department is committed to providing students with a rich and diverse educational experience, with opportunities for internships, study abroad, and research projects.

The Department of Architecture is also committed to partnerships with industry and government organizations, and has established strong relationships with Kenya's leading architects and designers. The Department is proud to be part of the vibrant architectural community in Kenya, and is committed to contributing to the growth and development of the architectural profession in the country.
